## Florida Medicaid Outpatient NCCI Procedure to Procedure Policy

- **QNXT Edit 9250 sUNf Pattern 7356**

The Medicaid unbundle edit verifies if the procedure code on the current line is billed with any other procedure for the same patient on the same day by the same provider. If the codes cannot be billed together and the current claim line is the deny code the edit will trigger, unless an appropriate modifier is allowed to unbundle the code combination.

Will appear on claims as “[Pattern 7356] Per Medicaid CCI Guidelines, procedure code <1> has an unbundle relationship with history procedure code <2>, on claim ID <3> and line ID <4>.”
