# EVV Mandate

Section 12006(a) of the 21st Century Cures Act mandates that Florida implements Electronic Visit Verification (EVV) for all providers enrolled directly in the SMMC program that furnish Home Health services (Home Health visits, Private Duty Nursing, and Personal Care Services) to recipients through the fee-for-service delivery system in accordance with Section 409.9132,(F.S.).

Molina Healthcare will implement our Electronic Visit Verification system as of October 1, 2019. Molina has partnered with HHAExchange as our EVV vendor.

Long-Term Care (LTC) Home Health and Personal Care providers will be required to use EVV effective 10/01/19.

# What is EVV?

EVV electronically captures:

- That a home care agency employee provided the agreed-upon point-of-care service
- The time that a visit began and ended
- The individual who received the service
- The date and location of the provided service

The purpose behind the EVV mandate is to track home health providers and ensure the visits they're reporting to CMS are actually taking place, that patients are getting the care they require, and that Medicaid is being accurately billed.

Other benefits of EVV technology solutions include the ability to:

- Reduce missed visits and late starts
- Improve patient care and client outcomes
- Reduce paper documentation traditionally associated with visit verification
- Increase productivity and efficiency among staff members
- Reduce costs associated with the use of multiple software products
